- Presented financial analysis and strategic recommendations that contributed to an 8% increase in revenue
- Conducted vendor and procurement cost analysis, identifying opportunities to reduce procurement costs by 10%

PROJECTS

Chipotle Three-Statement Financial Model | *Excel, Financial Modeling, Forecasting*

- Built a fully linked three-statement financial model for Chipotle using FY2022–FY2024 Form 10-K data and FY2025E–FY2029E forecasts driven by restaurant-level unit economics
- Developed integrated revenue, income statement, balance sheet, cash flow, lease, property & equipment, equity, and share-count schedules with restaurant openings, comparable sales, margins, and operating assumptions
- Implemented Base, Bull, and Bear scenarios with 40 internal checks and 129 independent audit checks to validate statement tie-outs, forecast consistency, and model integrity

Eli Lilly Valuation Model | *Excel, DCF, Financial Modeling, Valuation*

- Built a comprehensive DCF valuation model for Eli Lilly incorporating 2026–2030 revenue forecasts, operating margin assumptions, WACC, terminal growth, and free cash flow projections
- Valued Eli Lilly at an implied equity value of \$784.3B and implied share price of \$877.32 using a 6.9% WACC, identifying 8.2% downside versus the \$955.19 market price
- Performed scenario analysis and financial risk assessment across bull, base, and bear cases, evaluating the impact of GLP-1 adoption, pricing pressure, tariffs, competition, and regulatory risks on valuation

AI Portfolio Doctor | *Python, Streamlit, Portfolio Analytics*

- Built a portfolio analytics application using Python and Streamlit to evaluate portfolio performance, risk, and technical indicators
- Implemented Sharpe ratio, annualized volatility, maximum drawdown, Simple Moving Average (SMA), and Relative Strength Index (RSI) analysis
- Performed portfolio stress testing to evaluate risk exposure and portfolio performance under adverse market conditions
